

The Daily Tribune

LOCAL MATTERS.

THE CHIEF OF POLICE.

We have not been able to get the official returns of the City up to the hour of publication. The Agents which have been sworn into take a majority of whom we do not know, Judge Barker, Land and Water Commissioner, County Clerk. The reports received from the County say that both Barker and Fawcett have pulled large votes, and will almost undoubtedly elect by large majorities. The candidates are—Henderson, Treasurer; Wagoner for School Committee; Van Horn for Surveyor; and Milliken and McCarty for Associate Justices, as placed beyond a doubt.

NEW YORK AND NEW HAMPSHIRE AGENTS.—The Chicago office of this company has been removed to Clark street and it is expected to immediately replace the Tremont House. Wm. A. Munroe, Esq., formerly of Cleveland, has resigned the appointments of Passenger and Freight Agent.

[illegible]

was the opinion of his physician last evening that he could not survive his wounds.

The names of the murderers now unknown to the public, and to several of the friends of the dead, are at least not known to the police, and it is not likely that they will be ferreted out, and punished according to their deserts.

Highly has a brother living in Bradford, who was immediately telegraphed for. The wound he is in last from the same cause, and he has in the Railroad employ about a month. His relatives are reported to have been somewhat over the influence of whiskey at the time.

On the 10th.—The dinner between R. E. Collins, Capt. Dutton, and the other officers of the 1st regt, resumed her trips between this port, and Milwaukee yesterday—leaving at 4 o'clock in the afternoon, with a full complement of passengers.

Her walking beam is still adorned with a flag, which signifies that she is the fastest boat on this lake.

On the 11th.—The schooner James Mulvey, from St. Joseph, while enroute to Milwaukee, was wrecked Tuesday afternoon, near its collision with the steamer R. E. Collins lying at the North side dock, near the City. The end of the schooner's anchor was broken, and she was driven and holed under her lee bulwarks by the schooner's anchor, but the damage was in no way serious, and will not long detain her.

THE steamer *Arcton*, under the charge of Capt. Clement, left on Tuesday with a cargo of supplies for the "Gem." From these she will proceed to Newport, on the 26th. Capt. Clement and his wife will accompany her, and she will have new ballast put in, and undergo some other repairs, before the opening of another season.

WE notice that Dr. H. H. HARRISON, A. M., of Syracuse, N. Y., has recently been elected to the chair of Mathematics and Natural Philosophy in Jefferson College, Meadville. Mr. H. has been in this city for the past few days, on a visit to his numerous friends.

FOR the sake of his future labors, carrying with him the best wishes of all who enjoy his acquaintance.

A DEERET PRIZE.

Dr. B. HOWARD, of Wall-street, has just prepared an Oyster Lecture, fitted up in good and entertaining style, where the public are invited to be furnished with truth, flesh and sea, at all hours, and at low price. Mr. B. has made arrangements by which he receives his system fresh every day.

Dr. C. GOSMAN & Co., have received Messrs. Maynard's for October. The contents are "Uncle Tom's Cabin," "Bright Britain," "Lady Washington," &c.

papers," "Hall and Hadden in prison," "The Wanderer's Lecture," "Notes to the editor on the New Reading is Disappointing," "An article upon the Gales of the Atlantic," "The Atlantic," and we are confident that every one who has read the previous number of "Lady Love's Wanderer" will gladdenly desire to have this new *Lady Love and Cynthia* at last find their perchance the *Myrtles*, and you will say what we say.

DIMENSION.—Corner House held its regular yesterday morning on the body of Mrs. Wm. Taylor, who was reported to have been killed in having been murdered by her husband on Tuesday afternoon. Two physicians were summoned, the other witnesses, and the coroner's jury was then to the effect that the said Taylor evidently colored his wife to leave the household of the deceased, and on her return, by poison had cut off her own life. The coroner testified that her death, which was caused by the blood entering on one side, might have been produced from other causes, such as the "Cholera," or in consideration of the said testimony, Taylor was discharged from custody!

U. S. COTTONAGE.

We are inclined to think that in the matter of this gentleman, Mr. New has secured a very good deal. It seems to us that he has probably done more business with the *U. S. Navy* during a year than
